General Information

Solution Name

SERVE and REACT integrated vulnerability assessment tool

Solution Type

Digital Tool

Solution Owner

IANUS

TRL Level

TRL 4 - 5

Challenge solved

Target Pain Point

Lack of integrated, real-time and user-friendly tools to assess, visualise, and manage vulnerabilities in peri-urban areas, leading to fragmented decision-making and limited ability to prioritise risks effectively.

The Innovation

Core Functionality

- Vulnerability assessment and risk prioritisation
- Visual risk maps (heatmaps) to highlight critical areas
- Real-time monitoring of key indicators
- Scenario analysis to support planning and decision-making

Beyond State of the Art

- Combines assessment, monitoring, and decision support in one platform
- Provides easy-to-understand visual outputs for non-technical users
- Enables dynamic and continuously updated risk analysis
- Integrates multiple data sources into a unified environment

User value - Benefits

01

Clear identification of high-risk areas through intuitive visualisations (heatmaps)

02

Faster and more informed decision-making based on real-time data

03

Improved planning through scenario analysis and risk prioritisation

04

Enhanced collaboration between stakeholders using a shared platform

Implementation and validation

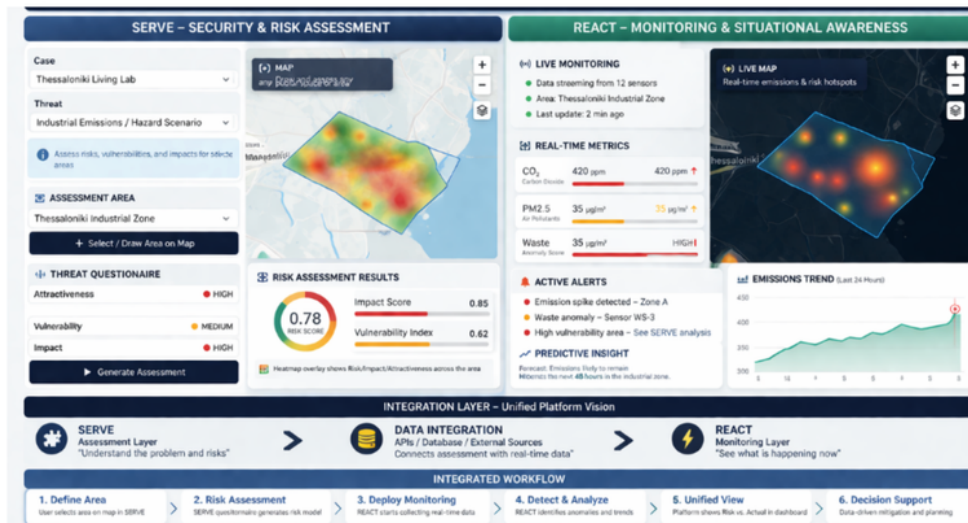

Living Lab

Can be tested in all Living Labs

Replication Potential

The solution is designed to be scalable and adaptable, allowing other cities and regions to adopt it by:

- Integrating their local data sources
- Customising risk indicators to local needs
- Using the platform for planning, monitoring, and resilience strategies
